Water-based Air Purifier & Air Freshener

Water-based Air Purifier & Air Freshener

COVERS 800 SQ. FT.

COVERS 300 SQ. FT.

Choose from Green or White

Choose from Silver or Gold

These miniature air fresheners work off the same water-based concept as the AF's, and use the same deodorizers & aromatzers to freshen the air in your home, car, or office.

- Counter-top Air Freshener
- Deodorizer and Sanitizer
- Removes smoke, cooking, pet, and all other odors
- Humidifier & Vaporizer
- Can be used to repel insects
- Great for every room in your home or office, or in your car!

**AROMATIZERS**

Lemon, China Rose, Cinnamon & Spice, Citronella, Lavender, Mulberry, Eucalyptus & Menthol, Italian Cream Cake. (1.6 oz.)

**AQUA BLUE AIR FRESHENER**

DEODORIZER & SANITIZER (8 OZ.)

Thermax World Headquarters  
3315 East Texas St.  
Bossier City, LA 71111  
Website: [thermaxaf.com](http://thermaxaf.com)

Email: [customersupport@thermaxaf.com](mailto:customersupport@thermaxaf.com)

**CARPET & UPHOLSTERY CLEANING SOLUTIONS**

Steam cleaning solutions available in 32 oz., 1 gal., & 5 gal.

- Citrus Carpet & Upholstery Deodorizer
- Liquid Carpet & Upholstery Cleaner
- Defoamer
- Bio Enzyme
- Carpet & Upholstery Spot & Stain Remover
- Carpet & Upholstery Guard

**OPTIONAL ACCESSORIES**

"I never thought there was much of a difference between vacuums, but when I bought a Thermax and saw the difference it made in the cleanliness of my home, I was amazed! My kids could play on the floor and breathe easier, and my family is the most important thing in the world to me. I loved the difference the Thermax made so much, I invested in the company!"  
Todd Walker

Products for a healthier indoor environment

thermaxaf

## Patented Hydropneumatic Water Filtration System

The Thermax AF2 works on the principle of hydropneumatics, water and air interaction. With two secondary washable filters, the Thermax AF2 rates as one of the most efficient filtration systems in the world because of its 99.99% allergy free operation. The Thermax AF2 combines commercial strength, constant cleaning ability and air flow with this unique patented water filtration system. This powerful combination allows you to finally deep clean carpets and upholstery, as well as remove dirt, dust, germs and bacteria that irritate the everyday allergy sufferer.

## Your Troublesome Dirt is Now in "Hot Water"

Almost daily, we are confronted with bad news concerning outdoor air pollution. However, did you know that your health is probably at greater risk due to indoor air pollution? The EPA estimates that people spend over 90% of their time in an indoor environment such as the home, workplace and automobile. Stagnant or recirculated air in these environments is a haven for contaminants, such as dust mites, smoke, aerosol sprays, radon, cleaning chemicals, dust, pollen, mold spores, viruses, cat allergens, animal dander and much more. These pollutants and allergens drift through the air ultimately becoming embedded within the fibers of upholstery and carpeting. They become airborne time and again through normal activities like walking, sitting and traditional vacuuming to produce an unhealthy indoor atmosphere (indoor air pollution). Through normal breathing, these airborne contaminants contribute to allergy and other respiratory symptoms that have been medically proven as health hazards by the EPA.

The good news is there is a solution for indoor air pollution... the Thermax AF2 Home Environment Cleaning System. In 1971, Thermax founder Carl Parise developed the world's first U.L. approved carpet steam cleaner (hot water extractor). Thermax has led the way once again by redesigning and incorporating its revolutionary hot water extraction and water filtration technology into a lightweight, compact, easy to use home care system, the Thermax AF2. It will replace your traditional vacuum and change the way you clean forever!

Water has always been nature's way to clean. We routinely wash our clothes, dishes and even ourselves with water. Now we can do the same for our carpets and upholstery. The Thermax AF2 employs a WATER FILTRATION SYSTEM, test proven to be over 99.99% efficient in washing dust, allergens and contaminants from the air, trapping them within the water while you vacuum. The

Electron Microgram of dust mite in household dust taken from a vacuum cleaner.

Microgram of Pollen Grains

Thermax AF2 then easily converts into a HOT WATER EXTRACTION SYSTEM capable of washing deeply embedded soils from the fibers of your carpet and upholstery - for unsurpassed water-washed cleanliness.

Cleaning with the Thermax is the most thorough and healthy way to clean. Our patented system operates constantly at maximum airflow efficiency, unlike traditional bag or bagless-type vacuums that can lose 50% or more of their airflow when the filter or basin is only one-third full. Because the aqua filter is emptied and cleaned after each vacuuming, the contaminants are permanently removed from your home—not left in a filthy traditional system, only to be blown back into the home environment through the dry filter's pores each time you vacuum. The Thermax AF2 Home Environment Cleaning System simply washes away the worry of indoor air pollution.

The Thermax® AF2 uses a patented water-filtration technology with two secondary polyurethane foam filters making it the most efficient, allergy-free cleaning system on the market. The AF2 is 25% smaller and lighter than the original AF. It is excellent for cleaning carpeting, area rugs, dusting, and cleaning all hard floor surfaces, taking the place of four systems in one!

*Thermax was not designed to compete with conventional vacuums. It was designed to replace them.*

Please view the amazing AF2 video on the homepage of our website.

Motorized Dry Vacuum Head

Aromatizing & Deodorizing Solutions

Water-Filtrated Recovery Tank

Hard Surface Tool

10' Patented Electrified Vacuum Hose (Optional 20' hose also available)

On Board Accessory Tools

2 Electrostatic Allergy Filters

Telescopic Stainless Steel Wand

Owner's Manual with Instructional DVD

## Laboratory Proven

Three independent laboratories tested the filtration efficiency of the AF2's 3-stage filter system and found it to be over 99.99% efficient! That means you'll get powerful, dust-free, allergy-free cleaning.

## Solutions For a Clean Home

Thermax produces and bottles a full line of environmentally friendly, hypo-allergenic cleaning solutions formulated to meet the demanding cleaning requirements of today's modern households.

## Did You Know...

- Infants who crawl on the carpet risk the greatest exposure to contaminants.
- Chronic fatigue syndrome can be attributed to poor indoor air quality.
- The air in the average American home is up to 10 times more polluted than the outside air.

### OPTIONAL AF2 STEAM CLEANING ACCESSORY KIT

16oz Thermax Carpet & Upholstery Cleaning Solution

Trigger Valve & Hose Assembly

Carpet Cleaner Solution Tank (1-Gal.) with Built-in Pump

Spray & Recovery Head

Also includes the Upholstery Hand Wand
