Thermax AF2

“Cleaning Nature’s way, with water”

Known for deep, thorough cleaning, Thermax is the industry model for carpet care that sanitizes floor environments while it purifies the air ... by trapping all the dusty allergens that other carpet cleaners catch and release.

With the AF2, Thermax brings that professional cleaning ability to the consumer along with impressive annual savings in floor maintenance costs. Homes and offices using the AF2 are in a constant state of cleanliness that surpasses other methods, and with the optional Thermax steam cleaning kit, the machine takes on all the qualities of semi-annual professional steam cleaning and extraction without the recurring cost. Clean carpets last far longer, too!

Summary of the features and benefits of the AF2:

Powered brush nozzle, the best there is, lifts dirt from deep in carpets

10' vac hose with stainless steel wand keeps all the corners, shelves, even ceilings within reach. The AF2 gives bare floors the same white-glove finish as the carpets get.

Dust and dirt that enters the AF2 stays there until the operator empties the water filter reservoir. What stays in the air with other systems goes down the drain with Thermax.

Environmentally conscious consumers appreciate the AF2 because it handles dirt once and for all, saving energy as well as time and preserving valuable assets.

Optional steam cleaning kit washes carpets clean but leaves them 90% dry – air-dry just 20 minutes later.

The Thermax AF2 home is cleaner, fresh-smelling and at optimal humidity, thanks to a system that defines the highest industry standards.

Customers who have rented Thermax carpet-cleaning equipment recognize the name and associate it with quality, ease of use and astounding results. Now they can own a comparable machine and enjoy all the benefits of routine use.

More than 500,000 customers have purchased Thermax machines, all made in America for the past 30 years. Thermax, which introduced the world’s first hot water extraction steam cleaner, is available only through authorized dealers.
